SUMMARY

Aspiring AI Engineer with a solid foundation in machine learning, data analysis, and cloud technologies. Currently pursuing a Diploma in Applied Artificial Intelligence at Temasek Polytechnic, I enjoy building practical AI solutions that turn data into meaningful insights. Passionate about innovation, problem-solving, and continuous learning in the field of artificial intelligence.

PROJECTS

Musical Alchemist - UX/UI Development using Figma Apr 2024 - Sept 2024

- Designed a music player mobile app using Figma with a clean, user-friendly interface.
- Built interactive prototypes using Figma's tools to simulate app functionality.
- Developed responsive layouts and reusable components for design consistency.
- Applied UX principles to enhance usability and visual appeal.

EcoTrack - Sustainable Living Mobile Application (Flutter Development) Apr 2025 - Sept 2025

- Developed a Flutter mobile app promoting sustainable living through eco-friendly habit tracking and rewards.
- Implemented authentication, data visualization, and point-based rewards using Firebase integration.
- Designed an intuitive user interface with custom widgets for a smooth and engaging experience.
- Built CRUD functionalities for event tracking, statistics updates, and user profile management.

SniffSense - AI Image Recognition App for Food Spoilage Detection (AWS Services) Apr 2025 - Sept 2025

- Developed an AI-powered image recognition app to detect food spoilage using AWS Rekognition and Lambda.
- Integrated AWS S3 and DynamoDB for image storage and data management.
- Designed a user-friendly interface front-end using HTML, CSS, and JS.
- Implemented AWS Lambda for serverless backend processing, reducing infrastructure costs.

HDB Resale Price Prediction (Machine Learning Project) Apr 2025 - Sept 2025

- Trained machine learning models from scratch to predict HDB resale prices using Python.
- Performed data exploration, preprocessing, and feature engineering to improve model accuracy.
- Applied hyperparameter tuning to optimize performance across multiple regression algorithms.
- Evaluated models using metrics such as MAE, RMSE, and R^2 score for reliable price predictions.

EDUCATION

Temasek Polytechnic Apr 2024 - Present

Diploma in Applied Artificial Intelligence

Damai Secondary School Jan 2020 - Oct 2023

Attained GCE O-Level certificate (4 Distinctions)

ADDITIONAL INFORMATION

Technical Skills

- Programming & Development: Python, JavaScript, HTML/CSS, Flutter, SQL
- Data & AI: Scikit-learn, Pandas, NumPy, Machine Learning, RAG Pipelines, AI Fundamentals, Data Analytics (Power BI)
- Cloud & Tools: AWS (Cloud Technologies), Github, Firebase, UIPath

Soft Skills

- Problem-solving and analytical thinking
- Collaboration and teamwork
- Adaptability and willingness to learn
- Communication and presentation skills

Languages

- English (Fluent)
- Mandarin (Fluent)
- Thai (Proficient)
